

Geographical education over the course of fifty years

Nick Hutchinson

The contents of the journal, *Geographical Education* are examined at the beginning of each decade as a means of discovering continuities and circularities that exist in the wider field of school education, societal transformations, changes in philosophical stances within the discipline, and changes in teaching methodologies. The necessity for strong disciplinary foundations, and the implicit threats to geographical education imposed by the introduction of social studies, led to the formation of AGTA. Similarly, the imposition

of the high school teaching framework, *Studies of Society and its Environment* eventually led to the development of the Australian Curriculum: Geography. The contents of the journals provide a record of travels over some bumpy roads but they do also represent a spirit of optimism, dedication to trying out new ways of teaching geography, and attempts to keep in touch with the bewildering changes that have taken place in university geographies.

Year	Bookshelf	The world beyond
1970	Berry, B. & Horton, F. (Eds.). (1970). <i>Geographic perspectives on urban systems</i> . Englewood Cliffs: Prentice Hall. Taylor, G. (1970). <i>Sydneyside scenery</i> .
