# GEOGRAPHY 142: TEACHING LANDSCAPES AND LANDFORMS

***A flexible, any where, any time online learning opportunity through Open Learning***

**Understanding the focus of the *Landscapes and Landforms* unit is key for effectively teaching Stage 4 Geography in NSW.**

This professional development course, created by Dr Paul Batten and Katerina Stojanovski on behalf of GTA NSW & ACT, examines strong approaches to teaching about *Landscapes and Landforms*. The course explores landscapes and landforms, value of landscapes and landforms, changing landscapes, landscape management and protection and geomorphic hazard.

The purpose of the course is to build teachers' understanding of these key ideas. By completing the learning activities participants will demonstrate their capacity to create engaging Geography lessons.

Skills developed in this course include:

- applying knowledge of the content and teaching strategies of Geography to develop engaging teaching activities (NESA Standard 2.1.2),
- using effective teaching strategies to integrate ICT into learning and teaching programs to make selected content relevant and meaningful (NESA Standard 2.6.2) and,
- contributing to collegial discussions to improve professional knowledge and practice (NESA Standard 6.3.2).

The course is designed for flexible delivery, where participants can start, progress and finish at times convenient to them. The collaboration is in a 'pay it forward' style, where participants engage with previous contributions and contribute themselves – learning in the process, but also adding to the galleries of exemplars and case studies for future participants to review.

**COST:** \$90 for each GTA online course, with discounts available on multiple registrations.

**COURSE REGISTRATION:** Available at –
